

Brayan Henao

Senior Software Engineer | Backend | TypeScript/Node.js · Go · Java

Colombia | bryanhenao96@gmail.com | linkedin.com/in/bhenao6 | github.com/brayanhenao

SUMMARY

Senior Backend Engineer with 8+ years building scalable REST APIs, microservices, and distributed systems in TypeScript/Node.js, Go, and Java on AWS and Google Cloud. Currently at Deel, owning technical design for HR platform features, with a focus on system design, data modeling, and modernizing critical areas of the codebase. Open-source contributor with 690+ merged pull requests to Cloud Foundry and Paketo Buildpacks.

EXPERIENCE

Senior Software Engineer — Deel, Colombia (Remote)

May 2024 – Present

Global HR and payroll platform: 35,000+ customers, 1.5M workers, 150+ countries, ~\$22B in annual payroll processed.

- Led the technical design and end-to-end delivery of a new HR feature that lets customers onboard employees without a contract, giving them full access to Deel HR features from day one. Fully released and now widely used across Deel's customer base.
- Regularly assigned to fix and revamp critical areas of the HR module: drove refactors of data models and system design that resolved long-standing reliability and maintainability issues.
- Designed and built REST APIs, data models, and event-driven features across multiple backend services in TypeScript/Node.js for core HR workflows, deployed on Kubernetes.
- Owned bug-duty rotations, resolving 100+ production issues and improving platform stability and reliability.
- Own technical designs for new features, review code across the team (600+ PRs reviewed), and contribute to code-quality standards; 500+ merged PRs.

Software Engineer II — VMware (acquired by Broadcom), Colombia

Feb 2021 – May 2024

Enterprise cloud and virtualization leader, acquired by Broadcom for ~\$69B in 2023. Tanzu Buildpacks team: maintainers of the open-source Cloud Foundry and Paketo Buildpacks.

- Maintained the Go, Python, and Node.js Buildpacks within the Tanzu Buildpacks team, owning code maintenance, feature development, and open-source community engagement.
- Designed and implemented microservice APIs in Go, improving performance and scalability while keeping the system robust and maintainable.
- Contributed 690+ merged pull requests across 30+ Cloud Foundry and Paketo open-source repositories (2021–2024), reducing build times and strengthening security for applications running on Cloud Foundry.

Software Engineer — Perficient Latin America, Colombia

Nov 2018 – Feb 2021

Global digital consultancy, ~7,000 employees, Fortune 500 clients; Nasdaq-listed, later acquired by EQT for ~\$3B (2024).

- Built and maintained applications for BrightInsight, a US healthcare company, using Java 8, Spring Boot, Cloud SQL, Spanner, and Maven, improving application performance and user experience.
- Led the migration of a monolithic application to a microservices architecture, cutting system resource use by 25% and increasing scalability by 30%.

Freelance Backend Developer — We Are Angular / DrillApp S.A.S., Colombia

May 2018 – Nov 2018

- Built backend services for a mobile app (Java EE, Spring, Node.js, Express) and managed its AWS infrastructure, cutting API response times by 25% and operational costs by 15%.

SKILLS

Languages: TypeScript, JavaScript, Go, Python, Java, SQL, Bash

Backend: Node.js, Express, Spring Boot, Java EE, REST APIs, Microservices, Event-driven architecture, Feature flags

Architecture: System design, data modeling, refactoring and modernizing legacy systems, technical design ownership

Cloud: AWS (Lambda, EC2, S3, RDS, CloudWatch), Google Cloud (Cloud SQL, Spanner), Cloud Foundry

DevOps & Testing: Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, Cloud Native Buildpacks, Jest, JUnit, Git

EDUCATION

MSc in Software Engineering — Universidad de los Andes, Colombia

2022 – 2024

BSc in Software Engineering — Universidad ICESI, Colombia

2014 – 2019
