SUMMARY

I am a Software Engineer with over eight years of experience, specializing in back-end development with Node.js, Golang, and Java. I have proven my ability to design, develop, and maintain scalable, reliable software solutions, and I am adaptable across AWS and Google Cloud, demonstrating my versatility.

EXPERIENCE

Senior Software Engineer

Deel

May 2024 - Present, Colombia

- Actively contributed impactful changes to the HR module in the Deel App.
- Responsible for creating and launching a new feature that allows customers to onboard employees onto the platform without a contract. This enables employees to fully access all Deel HR features without needing a separate agreement.
- Reduced platform bugs by applying a bug duty strategy, ensuring a more stable and reliable user experience.
- Designed and built robust APIs using Node.js, greatly improving the system's performance, scalability, and maintainability, which increased operational efficiency.

Software Engineer II

VMware (Acquired by Broadcom Software)

February 2021 - May 2024, Colombia

- Elevated the Buildpacks ecosystem by leveraging expertise as a Go, Python, and Node.js maintainer within the Tanzu Buildpacks team, overseeing key responsibilities such as code maintenance, feature development, and community engagement.
- Designed and implemented APIs with a microservice architecture using Go, optimizing performance and scalability while ensuring the system's robustness and maintainability.
- Actively participated in the CloudFoundry/Paketo community, contributing over 700 impactful changes to Buildpacks open-source repositories within the CloudFoundry/Paketo organization since 2021, resulting in improved build times, enhanced compatibility, and strengthened security for applications running on Cloud Foundry.

Software Engineer

Perficient Latin America

November 2018 - February 2021, Colombia

- Developed and maintained software applications for BrightInsight, a US healthcare company, using Java 8, Spring Boot, CloudSQL, Spanner, Maven, and other technologies. My contributions significantly enhanced application performance and user experience.
- Reorganized the application architecture into a microservices framework, ensuring strict adherence to high-quality standards. This resulted in a 25% reduction in system resource use and a 30% increase in scalability, demonstrating the effectiveness of my approach.

Freelance Backend Developer

We Are Angular/DrillApp S.A.S.

May 2018 - November 2018, Colombia

- Developed backend components for a mobile app using JavaEE, Spring, and SQL, achieving a 25% reduction in API response times.
- Designed and built microservices with Node.js, Express, and Jest.
- Managed AWS infrastructure strategically, including Lambda, EC2, S3, CloudWatch, and RDS, leading to a 15% decrease in operational costs and improved deployment times.

EDUCATION

MSc in Software Engineering

Andes University • Colombia • 2022-2024

BSc in Software Engineering

ICESI University • Colombia • 2014-2019

SKILLS

Languages: Node.js, Python, Golang, Java / Bash scripting / Cloud: GCP, AWS / CI/CD tools: GitHub Actions, Jenkins, Terraform.
